EVCP STAR Achievement Award Recipients

STAR Achievement Awards [1] are designed to recognize sustained, exceptional performance and/or significant contributions from an employee(s) over an extended period of time (minimum of six months). In some cases, the activity rises to the level of a major achievement as part of a big project, in other cases a staff member engages in a sustained effort to take responsibility for professional development in an area that adds value to their work and results in a significant improvement in their unit. The contribution that is being recognized at the Achievement Award level must reflect, at minimum, one of the Chancellor’s Priorities [2] and/or the UCSF Pride Values [3].
